DEALER STORY: EARLY RETIREMENT

The most enjoyable thing is when we already have flexible time. We are no longer tied to a work schedule that demands so much attention. Now i feel happier because i can watch my children grow up in front of my eyes, and most importantly, i can devote my time to my beloved father. In the past, i did not have the chance when my late mother was still alive. it does not mean i am not busy anymore, but now i can manage my own time.

(Puan Hanis Zafirah @ KekNis)

From being a lecturer who required a high time commitment, i decided to retire early and now generate an income similar to working in the office as a PGBO.

This allows me to spend more time with my parents and enjoy freedom in managing my working time.

(Puan Norhasmillah)

I chose to retire early without pension to take care of my husband who suffered a stroke.

Now i generate income as a full-time PGBO.

Lack of experience, being shy, or learning slowly is not a barrier to becoming successful as a PGBO, especially when you are with TKL Empire.

(Puan Juraidah)

DEALER STORY: VARIOUS BACKGROUNDS

I started building this business during the final semester of my diploma as a backup plan in case i did not secure a permanent job. after completing my degree, i managed to achieve a four-figure income comparable to a working postgraduate. seeing the strong potential in public gold, i decided to focus on this business full-time to accelerate my growth and build more stable finances.
(Cik Aini Kamal)

I am a former public servant in the security sector for 21 years and experienced a long-distance marriage with my wife for 3 years. now i have chosen to become a full-time public gold business owner (pgbo) as a strategic step to master gold knowledge, protect wealth value, and generate income. alhamdulillah, this decision has given me financial stability and more quality time with my beloved wife.
(Tuan Faizul)

I am a housewife who previously worked as a tailor and baker, and now actively serve as a public gold dealer. i chose this business to build my own gold savings while helping other housewives generate flexible income from home without large capital. by consistently learning and following the system, i managed to achieve a four-figure monthly income while still prioritizing my family.
(Puan Arpah)
